Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). SUPERVISORY PATENT EXAMINED					

Continuation of 11. does NOT place the application in condition for allowance because: Regarding 112.1

1) Applicant seems to misunderstand what is being rejected. It is the limitation of "which is unrelated to a content of information posted" lacks support.

2) The Examiner understands applicant's argument of "interactivity between users are measured by the metric, not the content of the information posted".

3) However, nowhere in [0026]-[0028] mention or suggest that the interactivity is unrelated to the content of information posted.

4) Applicant is advised to cancel "which is unrelated to a content of information posted" to overcome the rejection.

Regarding 112.2

The amendment of "an appropriate group" to "a group" has overcome the rejection.

Regarding 102

applicant argues that Netscan fails to teach "categorizing the collaborative space into one of a plurality of groups based on the interactivity metrics" because the categorization of Netscan is not based on the interactivity metric.

- 1) In [0027] of applicant's spec, it clearly states "average number of response" is one of the interactivity metric. Here, Netscan allows reranking (or "categorizing") of newsgroup by "number of replies". If that does not read on the claim, applicant does not have it either.
- 2) Applicant's remark seems to contradict with the spec and may lead to 112 rejection.
